is goodly trea
ye thou must ta
ke hede to. iiii. thynges.

That is to say, to þe sub
staunce, to the colours, to the regy
ons, and to the contentes, whyche
longe to the dome of vryne.

And fyrst loke to the vryne whether
it be thicke or thynne, or els betwe
ne bothe, than shalte thou se thro
ghe the vryne the ioyntes of thy fin
gers, and that it betokeneth a badde
stomake and water in the bowels.

And yf the vryne be betwene thicke
and thynne, than it be tokeneth swel
ling of þe gal. The seconde is that þe
shalte take hede to þe colours of þe vry
ne, as saith þe mayster of phisicke. &

a stronge fauoure & like in gobettes
in the bottom, it cometh fro the bla-
der, yf it be spotted as bloude & red
than the payne is in the raynes and
in the share, if it be clere & blacke
than the payne is in the backe and
in the share and about the bladder.
¶ Rawe humours is a contente of
the vryne whych thou shalt knowe
thus. If the vryne after his casting
flete full of grauel motes, the why-
che come of the resydence of the bo-
tom, or in the mydde region, than
in the vryne be rawe humours. And
yf the rawe humours be aboue on
the water, it betokeneth a straye
bede in þe brest a shorte of brette and
nyppinge of of the splen. And it ap-
pere in þe midde, it betokeneth grud-
ging in the body and clensing in the
guttles, and wynde in the stomake.
All thys cometh of excisse of meate
and drinke. And if they be in the bo-
tom, the payne is in the raynes and

some tyme it is in the codde. That
heed wout Arcys betokeneth wa-
sting of grece about the foundamēte
If it be wyth an arcis it betokeneth
wastynge of the bodye. In the fyrst
spyce of the Etyke the fat heed ho-
ueth aboue the parties as it were of
fat broth. The secōde spyce that hyl-
leth all the byrne aboue, is lyke the
webbe of Erren. The thyrde spyce
the byrne is thicke ouer all fat as
oyle, & if it be cast on a marble stone
it sheweth as oyle, and thys spyce is
vncurable. Vermin cōtentes they
be lyke to byrne, some tyme rounde as
clales of a fysh. If they appere w
in an Arcys, they betoken the fyrste
spyce of the Etyke, they do appere like
vnto byrne that hath lytell of the
flowre wyth hym. In the thyrde spice
of the Etyke, there do appere con-
tes lyke these two fyrste, but they be
greater, and than they be all whyte
in grauel, red betokeneth the stone
in the

in the raynes. If the garuell be
whyte or blacke, and harde & greate
it betokeneth the stonie in the blad-
der. And yf they be reed and nelshe
it betokeneth bzent bloude in the it-
uer. ¶ Notes that be whyte and
small and rounde betokeneth the
goute both in the man and woman.
If they appere in the botom, it be-
tokeneth the reumatyke goutte, both
in the stomake and in the brest.

If they do gather than in a rounde
gobette and do lye so thicke on the
botom vnder the cyrle, yf they be
reed yf she and rounde it betokeneth
a man chylde. If they be whyte or
blewe and thynne as scales it beto-
keneth a woman chylde. ¶ Heeres
that be long and small, yf they shew
wyth an Arcys, it betokeneth wa-
stynge of the booke. And yf wyth
the arcis be a flye and these heeres
appere it betokeneth death.

¶ Spermatyue resolucyōs if they
B. lll. appere

appere fctyng about in the byrne,
and the byrne rawe in colour, it be-
tokeneth pyssyng, of kynde wyth-
out lykynge. If the byrne be hye
of colour, it betokeneth that it was
made, post suppositum. ¶ Also
yf they appere in the byrne and the
byrne be whyte of colour, wyth re-
solucyons blacke and blewe beinge
in the botom it betokeneth the Eme-
rowdes . Also yf the contentis be
blacke or blewe or Purpure wyth a
lowe colour, it betokeneth stoppyng
of the flowre. ¶ The laste content
is called Apostacis. It standeth in
the betom, brode beneth, and sharpe
upwarde. If thys content be whyte
and brode in the botom, and sharpe
upwarde wythoute breakynge and
longe lastynge, it betokeneth that y
sycke is worse than he was. If it
be broken or haue in the myddes or
els about in the partyes, it betoke-
neth that the sicke man is colde in
the

the lyuer and it may nat desyre. And
it be in the myddes, than it is called
Aptylys, and it betokeneth badde
digestyon, and lengthe of spekenes.
And it be blacke, it betokeneth de-
struccyon of kynde and deathe.

Now haue I shewed you the
substaunce of vynes, the co-
lours, the regyons, and the conten-
tes belógyng to vynes. And now
wyl I shewe the compleccyons. If
the vyne be thicke and reed than it
betokeneth bloude. And if it be reed
and thynne, than it betokeneth co-
loure. And it be thicke and whyte
it betokeneth fleume, & it be whyte
& thynne than it betokeneth malan-
colye. And yf thou knowe the com-
pleccyons, by the coste of the vyne
loke if it be swete, thā it betokeneth
bloude. If it be sowre it betokeneth
coloure. And it be whyte wout sa-
uoure as water it betokeneth fleum
& it be salte it betokeneth malācholy

How þ cōpleccions be gathered.

If thou wylte know where the-
se cōpleccions be gendred in a
mā's bodye. I saye that colour
is gendred in the lyuer and his dwel-
lyng is in þ cofer of the gal. Bloud
is gedred in the lyuer, and his dwel-
lynge is in the bayne. Fleume that
is naturall is gendred in the lyuer,
and it hath no proper dwelling and
therfore he is medled with the bloud
to make the bloud rennyng. Malā-
coly is gendred in the lyuer and his
proper dwelling place is in the sple-
Malancoly and fleume kepe the bo-
tom of the byrnall.

Howe thou shalt descerne mans
byrne fro womans byrne, & beastes
byrne fro man and wo man.

Thus I wyl that thou vnder-
stande that yf there be anye
troubled in mans byrne it shewethe
in the myddis of the byrne, and in
the womannes byrne it dothe nat so
and

and there is thys the froth after the
castynge of mannes byrne it shall
be long, and of a wamans after the
castynge it shalbe rounde. These
two lasse tokens, Apocena sayeth.

A Nowe beastes water fro mans
water. Beastes water is the saddet
& moze suple of cōpleccyon. Also the
beastes water swelleth moze thā the
mannes. Another medle the byrne
of a beaste wyth a mans byrne, and
they shall part alonder. And it be a
Cowe that is wyth calfe it is good
to knowe fro a woman that is with
chylde, for the byrtes or the conten-
tes of the Cowes byrne is muche
greater than the byrne of a woman
in asmuche as the woman is lesse, &
fayrer of cōpleccyon than y cowe is.
If thou wylte knowe the fyrste
water and the secoude, the godheed,
sheweth whether he be in greate
eatynge & drynkynge & than the fyrste
water is greater in quantite or lesse
drynkynge

Thynkynge than the seconde, or els if
he lyue measurablye, than the fyrste
shalbe more thicke than the other.

Nowe haue I tolde þ of the sub-
stance with the colours of the byr-
nes and compleccyons, & to knowe
mannes byrne, and womans wyth
chylde fro the byrne of beastes.

Here foloweth the verry know-
ledge of all byrnes.

Men and women fyrst I wyl
begynne at the byrne moste
for your helpe and health.

 A byrne fat and troubled, beto-
keneth a brennyng feuer that
commeth of coloure.

 A byrne that is reed and thicke,
ouer al with a blacke cyrcle, be-
tokeneth syckenes ouer al, and
the Pacient sweate nat, it is deathe.

 A byrne that is whyte and thyn
and lytell dunne, it betokeneth
colde in the body.

byrne

 Urpne cleare wpyth a blacke cy-
cle betokeneth that the lycke is
typke.

 Urpne thynne and somewhat
reed and clere w a bright cy-
cle betokeneth a bad stomake.

 Urpne thynne and somewhat
grene aboue betokeneth colde
cōpleccyon. And if thewe blew
aboue in the castpuge, it betokeneth
typke.

 Urpne thynne and somewhat
blacke aboue in the castpug be-
tokeneth great losse of nature.

 Urpne thycke and troubled as
horse pyffe betoketh head ache.

 Urpne fat in the botom, whyte

the ouerwharte, or that he vnder
standeth nat a ryght, and these syke
nesses go nat from hym, they betoke
neth death.

The thyrde knowlege of byrnes
the whiche is called the
regions.

Thou shalt vnderstand that
in the byrnes whan it is in
byrnsall there be thre regions, the
 fyrste, the seconde and the thyrde.

C.ii.

The

The thyꝛde beginneth at the botom
of the byꝛnal & lasteth to the thicke
nesse of two fingers bꝛede bpward.
The seconde beginneth there as the
thyꝛde dothe ende, and lasteth bp-
warde to the cyꝛcle, and the fyꝛst fro
that all bpwarde, and in euerye of
these regyons be dyuers contentes.

Dwe wyl shewe the
foure contētes that be
long to byꝛnes & first
I wyl begin at froth.
Froth þ̄ dwelleth and
cleueth to the cyꝛcle, betokeneth in-
degestion and wynd in the stomake
and in the bowels and in the head.
And yf aboue þ̄ frothe dwell greate
bubbles, it betokeneth greate payne
in the raynes. Froth also that dwel-
leth greate, betokeneth indegestyon
and wynde, And yf the frothe dwell
small, it betokeneth brennyng in
the stomake and bzent bloude in the
liver

lyuer. If the froth be ful of graines
it betokeneth reume in the head, and
in the breste and in the blacke Jaun-
nesse. And yf it be grene, it betoke-
neth the Jaunesse that commeth of
brent bloud in the lyuer, as of enuy
and wrath, and bothe be in the spice
of the Jaunesse, & also of the blacke
Jaunesse is swelling of the gall.
And it be a swart y^e pelow, it com-
meth of great heate of the bloude of
the lyuer. A small skye apperyng
and shadowyng the byrne aboue
yf y^e byrne be a pattye blew, it beto-
keneth payne at the herse, and short-
nes of brythe and wynde that com-
meth of the longes, and if the byrne
be nat blew and suche a skye sha-
dowe the byrne aboue, it betokeneth
chafyng of the lyuer, and specyally
yf the frothe be pelowe.

 A cyrcle thyecke and lytell co-
loure betokeneth payne in the
braynes.

 A cycle thicke and lytell, and coloured as purple betokeneth payne in the foreheade.

 A cycle blacke or whyte, then and lytell coloured, betokeneth payne in the lyfte syde of the heade.

 A cycle thynne and hye of colour, as reed, or yelow betokeneth payne in the ryght side of the heade.

 A cycle coloured as blode betokeneth Epulence.

 A cycle grene betokeneth the waucynge in the heade and brennyng in the stomake. And it appeare in an Arcys that is hote, it betokeneth the frenesye that cometh of colde.

 A cycle that is coloured as a bryght blew, yf it trymble it betokeneth deathe, and name-lye an hote Arcys.

A cycle

 A cyrcle thicke, and blacke o-
uer all betokeneth deathe.

 A cyrcle that quaketh betoke-
neth paine fro the necke downe
to the rygebones ende.

 Graynes that dwel in the cir-
cle, after castynge of the byrnie
gone downe, and after ryse vp
agayne to the cyrcle they betoken
rewme in the heade, and yf they go
downe and tourne not agayne to þ
cyrcle, than they betokeneth rewme
in the brest, in the longes, and in the
splenne. And yf thou se two small
graynes in the seconde region oꝝ mo
oꝝ lesse knitte to a small skye, that se
betokeneth payne in þ brest of rew-
me, and wicked stomake, bad lpuer,
and bad longes.

How thou shalt know the pulse.

Wā thou touchest þ pulse
w thy foure fyngetes, yf þ

be

be fell and smyrtynge and vnder the
leche fynger it be stronger, and vn-
der the nyble fynger more stronger
and so goyng bpward it betokeneth
good, and it be the contrary, it is e-
uill, & betokineth deathe, as thus.

If the pulse be feble vnder the fyrst
fynger, and vnder the seconde more
feble, and so goynge bpwarde it be-
tokeneth death. Also yf the pulse be
flete vnder foure fyngets to be come
to his stroke, and he fayled in the. xi.
stroke, it is good. And it be the con-
trari, it betokeneth death. And if the
faute come of the. xi. and be feble, &
in the. x. more feble, in the. ix. and so
goynge downewarde, that betoken-
eth death.

And knowe well that there be
humours composed & haboundaunce
in the same membres, and so they
must be despyed lyke as they be com-
posed in diuers humours. And mem-
bres, mebecynes laxatyue composyt,
and gendred togyther as dyuerslytpe
of humours, and membres.

There be some receytes that p̄in-
cypallye voyde fleume, as doctours
do saye, and they call them Electua-
ryes, as these that do folowe. Jera-
pygra

pygma, Benedicta, Blanca, Jobo-
rycon, Araccardium, Stomaty-
cum laxattuum, Dillearchi, Saul-
num. There be other receptes that
pyncypally do purge Melancoly,
as these Ketarcarya imperyale, He-
rafut, Diacene. Cryffeta faracyna,
Acalogodion Theodorum, Enpre-
fton. Nowe some there be that prin-
cypally boyde coloure, as a Lectua-
tye de succo Rosarum, and Diapru-
nts. Also dyuerfyttes of membyes, of
uerfyttes of medecynes.

Also Therapigra, and Benedicta
of theyr properties, shoulde boyde
fleume, and Benecta namelye in the
raynes, boydeth fleume. Refro-
lyn an Acalacca do purge properly
the fleume in the heade. Also it is
good for the eares, and the eyes, and
it purgeth the hardnesse of the splen,
and it maketh clene the Harres.

Benedicta þ is called the blessed
recepte, for it is good for the Goute,
D.ii, in the

in the loynes, in the handes, and in
the fete, in the bladder & in þe raynes.

¶ Bilule Chochie they pourge humours fro the webbe of the brayne.

And it is good for the Epplenke.
Ballynum is called the greates an-
tedoctary, it hath the great vertue. It
is a good lectuatyve for the longes,
for the olde coughe that is depar-
tyng of the colde humours fro the
head to the brest. And it is good for
the bycesse of the breste of colde hu-
mours and purgeth the heade, the
brest and the stomake of fleume, and
meloncolpe. And the quantyte that
shulde be vsed therof is the weyght
of two pens halfe peny at ones, and
the pacient be stronge of complec-
cyon, than gyue to the pacient two
drāmes, that is double that weyght
before sayde, and so it dureth and
worketh as dyuers humours do a-
byde in dyuers membris more than
nature wyll, Euenly dyuers mede-
cynes shulde euenly be medled togy-
ther. And of some medecyne more
than of another, as medecynes that
be compounded shoulde be sharped
wyth

wyth opuers watyrnynges. And the
medecyne shulde be mad of dyuers
thynges, as the dyuersyte of hu-
mours do aske.

¶ Here folowe medecynes to
purge Melancoly.

Purginge of medecynes Melan-
colyous, the fyrst is Fera Rust-
ni, the whyche purgeth and boydeth
Melancolyes: so that it is good for
thē that be scabbed of a salte fleume,
and for an euyll called Elepheye
nyghe as it were lepro. And it is
good for the Moxefewe that wyl
chaunge in dyuers places.

¶ Also Diacene a lectuarie, wyl a-
uoyde þ habundaunce of humours
in the splenne, and the herte. Also yt
is good for þ splenne, or for them þ
be troubled wyth fantasyes or so-
rowes. ¶ Trifera sarasentica, it is
called Trifera because it makethe
olde men to appere yonge men. And

D. llii.

it is

It is called *Saracemica* because it
was founde among the *Sarasyngs*.
It boydeth *Melancolye* out of the
heades, the stomake & the liuer, and
the synowes that go to the splentie.
Also it is good for *Veterpca* whyche
is called the great Jaunisse, whyche
commeth of colour that is bzent.

 *Crologodyon Nymphytum*,
Tera Sacra Logola and *Struere*
Nimphytum and *Impeditu*. This
lectuary will heale a man that may
nat speake, for it purgeth properlye
out of the heade *Melācoli* & *Neume*
so that it is good for the Synowes

cis

tis. Also it letteth roule winde out
of the stomake and the raynes.

Also it is good for Illiolum the whi
che is a malady that rotteth deadlye
wynde yfselfe byneth in the chynnes
ende and goeth to the hert.

¶ Here foloweth Electuaries to
auoyde Coloure.

Rowe wyll I wyte of them y
auoyde coloures, and fyrst of
the Electuary called diaprium.

It is called so because it standeth
most by Prunes, and it boydeth co-
lour fro y^e stomake and fro y^e lyuer.

¶ Electuarie of the ioyce of Roses,
that is properlye a gaynste the hote
Goute and purgeth the red colour.

And it is good for the syckenesse in
the ioyntes of colour. And for them
y^e be ryght sycke in y^e Feuer terepan.

¶ Holwe thou shalt knowe to gyue
the quantyte of Medecynes.

Medecynes before that they be
compounded together, they
